

Botanischer Garten zu Hamburg

den 11<sup>ten</sup> Januars 1839.

Dear Sir!

Your favour of 30<sup>th</sup> November last announcing  
Your safe arrival in Europe has the more rejoiced me,  
as it opens to me the agreeable view of Your personal  
acquaintance. If ever possible try to dispose of Your  
time in such way, that Your abode here be not a  
too short one.

I am likewise highly pleased to learn that You  
have undertaken together with Dr Torrey a new North  
American Flora a work which will certainly contain  
plenty of most interesting news.

The announced parcels with the copies of part 1 and 2  
of the mentioned work and those with dried plants have  
not yet reached me. When in my hands I shall dispose  
of them agreeable to direction and keep the dried  
plants until You dispose of them.

Pray present my sincere regards to Mess<sup>rs</sup> Hooker  
and Graham and continue to remember friends

Dear Sir

Your most sincere and obliging

Lehmann
